Second prize (Senegal)
Author: Omar Fofah, Lycée Moussa Fall de Louga

Second prize (Canary Islands)
Author: Laura Melán del Castillo, Colegio Decoy

...join this network.

Isidro Ortiz

I am so glad that the contacts among different parts are starting to come up... we are aware that we are so close geographically, but very far because of the distances human beings set. I have hope that this contact will increase very soon.

Amadou Ndoye

Friends, partners, colleagues: the world is a tissue, together we can build a better world. Then, let's invent the way we are going to talk, to exchange. Canary Islands can be the link to connect also with the American continent. I really believe that this can be possible and we have to try it. What is not tried cannot be achieved.

Eduardo Galeano

Dears, there are networks that tie. Let's hope nobody will get tired, never get tired of being weaving these networks that connect those who still believe that other world is possible, a little world inside this one we are living in waiting to be born, the one we know and we suffer.

EDUCATIVE NETWORK WITHOUT BORDERS

This network appeared in 2004

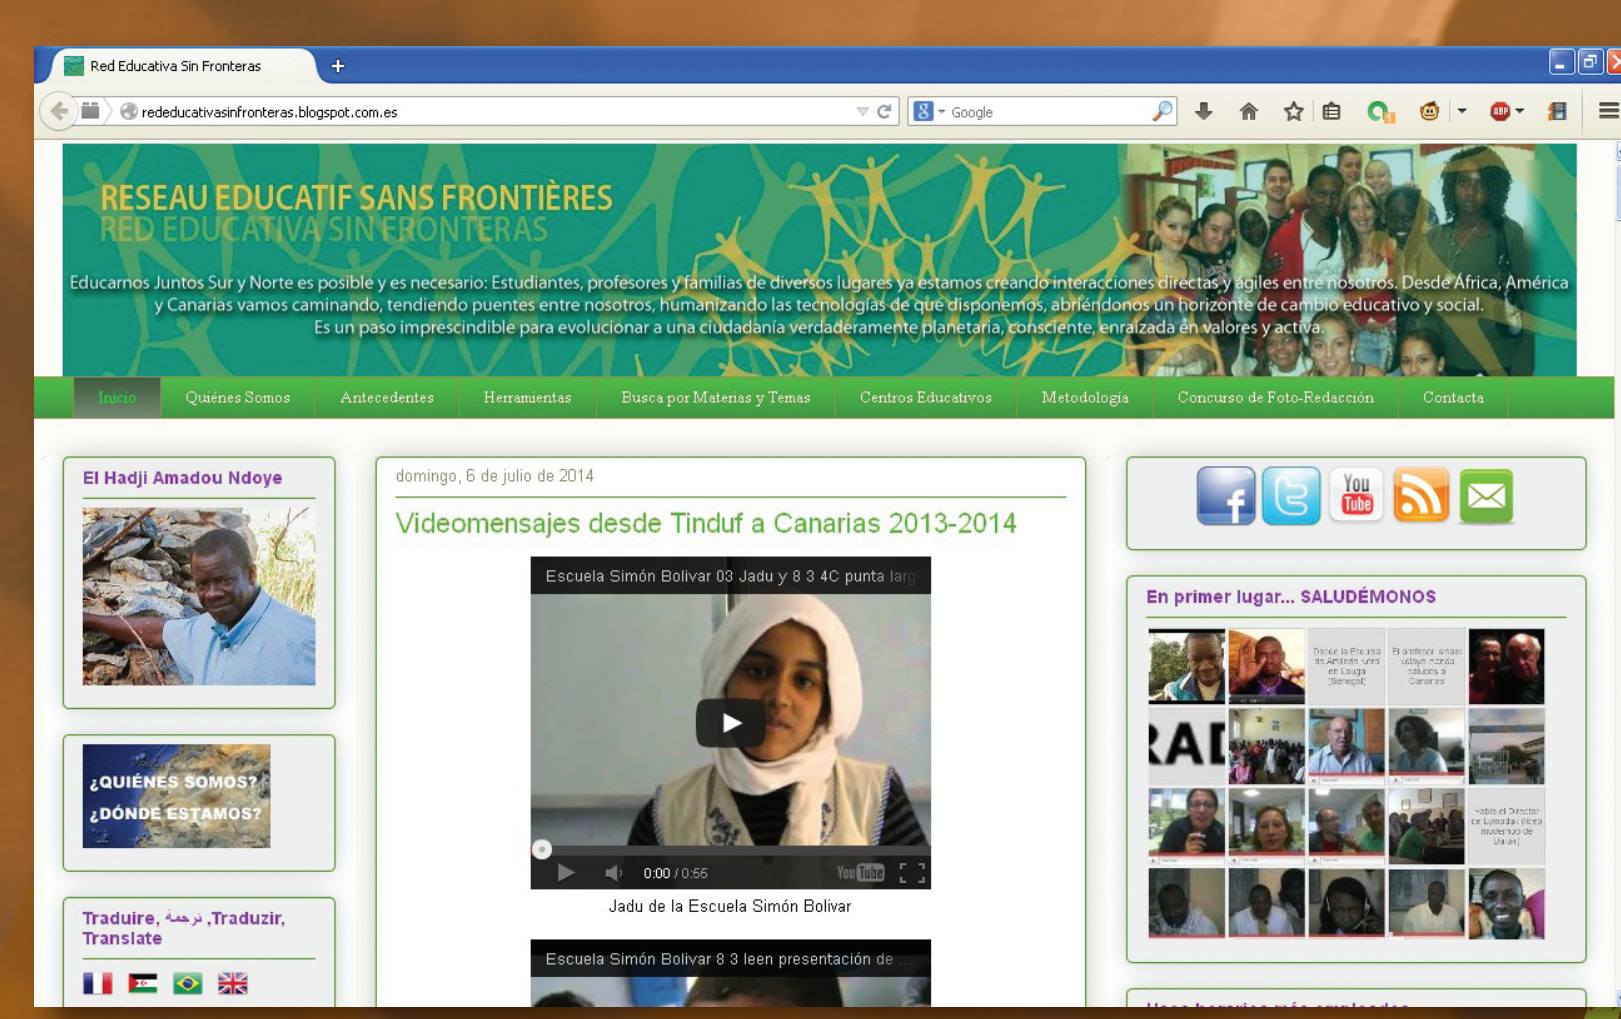

With the video "Vecinos sin complejos" (neighbours without complexes). A group of Senegalese teenagers in Dakar, sent a video-message to the adolescents from Canary Islands.
